

HUMAN HERPESVIRUS 6A AND 6B TRANSFER FACTORS FOR THE
TREATMENT OF CHRONIC FATIGUE SYNDROME AND MULTIPLE
SCLEROSIS

5 Abstract of the Disclosure

The present invention provides transfer factors that
confer cell-mediated immunity to Human Herpesvirus-6A
and Human Herpesvirus-6B. The invention also provides
10 pharmaceutical compositions comprising the transfer
factors and methods of treating abnormalities in a
subject using the transfer factors.
